Key Messages

• The number of active craft distillers* in the U.S. grew by 11.5% over the last year to 2,046 in August 2019.

• The U.S. craft spirits market volume (cases) reached nearly 9m cases in retail sales in 2018, growing at an annual growth rate of 25.5%. In value terms, the market reached $4.8 billion in sales, growing at an annual growth rate of 27.0%. The market share of U.S. craft spirits as a share of total U.S. spirits volume and value reached 3.9% in volume and 5.8% in value in 2018, up from 1.5% (volume)/1.8% (value) in 2013 and 3.2% (volume)/4.6% (value) in 2017.

• Exports of U.S. craft spirits dropped to 304,000 cases in 2018, adding 3.3% of additional volume to U.S. craft distillers’ total sales. Exports decreased by nearly 50% versus last year.

• The U.S. craft distilling market is fairly concentrated with nearly 2% of the larger producers (between 100,000 and 750,000 proof gallons removed from bond) being responsible for 58.1% of the cases sold. 92.1% of U.S. craft producers are classified as small producers (between 0 and 10,000 proof gallons removed from bond). They are responsible for just 12.9% of the cases sold annually.

*Active craft distillers: licensed US distilled spirits producers, removed 750k proof gallons (or 394,317 9L cases) or less from bond, market themselves as craft, are not openly controlled by a large supplier, and have no proven violation of the ACSA Code of Ethics.
Key Messages (Continued)

• Direct sales at the site of the distilled spirits producer (DSP) are important for all craft distillers but especially important for small producers where these sales make up 44% of total sales. Out of state business is particularly important for large producers, accounting for 66% of the total business.

• Many surveyed retailers and wholesalers see the potential for craft spirits to perform in line or better than craft beer over time. With craft beer market share currently at 13.5% in the U.S., the craft spirits market is expected to continue to grow rapidly.

• Employment in the U.S. craft spirits industry has been on the rise: in 2018 industry employment grew by more than 7,000 to over 25,500. In 2018 investment by the U.S. craft spirits industry increased by over $86 million reaching over $679 million in total.

• Investments in equipment and staff in the US craft spirits industry have accelerated in 2018 and are expected to continue to accelerate in 2019 due to the impact of the Craft Beverage Modernization and Tax Reform Act which became effective January 1st, 2018.
Craft Spirits Research Definition
Craft Defined for Purposes of the Research

Size:
Not more than 750,000 proof gallons (or 394,317 9L cases) removed from bond by licensed producer (DSP)

Self-proclamation of licensed craft distiller, not openly controlled by a larger supplier:
Distiller claims to be a U.S. craft spirits producer with a valid DSP license and is not openly controlled by a larger supplier

ACSA Code of Ethics:
"We operate in an honest, transparent and non-deceptive fashion. We inform consumers truthfully and accurately about the sources and methods used to make our spirits through our labels, materials and communications. We expect fair dealing and respect amongst members. We obey all federal, state, and local laws."

U.S. Craft spirits (for the purposes of this research)
U.S. Craft spirits are distilled spirits that are produced in the U.S. by licensed producers that have not more than 750,000 proof gallons (or 394,317 9L cases) removed from bond, market themselves as craft, are not openly controlled by a large supplier, and have no proven violation of the ACSA Code of Ethics
Craft Spirits Market Data
From DSPs to Active Craft Distillers

# of DSPs by Segment as of August 2019

- All licensed DSPs: 3,134
- Duplicates / multiple locations of any supplier: 206
- Leading suppliers: 43
- Bottlers / industrial: 118
- Not operational or non-craft: 353
- Research universe: 2,414
- In planning: 368
- Active craft distillers: 2,046

- The list of DSPs is broken down into segments in order to distinguish the amount of distillers that are not considered craft: duplicates, leading suppliers, bottlers, and/or non-craft/non-operational.
- The list of active craft distillers is generated bottoms-up through individual assessment.

Project Background and Craft Spirits Definition
Teaming up for a common cause

The American Craft Spirits Association, International Wine and Spirits Research, and Park Street teamed up in 2015 to launch the Craft Spirits Data Project (the “Project”), a research initiative with the goal of providing a solid and reliable fact base for evaluating performance and trends in the U.S. craft spirits industry:

- Major industry stakeholders such as the TTB, NABCA, WSWA, and ABL have committed resources to help the Project.

- The fact base helps all stakeholders to make their respective investment cases and vastly improve an understanding of the full impact at the local, regional, and federal level.

- The Project is set-up to provide a consistent fact base for all stakeholders on an ongoing basis. Update reports will be published annually.
Project Background and Research Methodology

- **The project serves to:**
  - Quantify the number, size, and impact of craft spirits producers in the U.S.
  - Create a deeper understanding of the U.S. craft spirits landscape among four key groups: DSPs, wholesalers, retailers, and consumers
  - Provide findings on craft supplier best practices and success factors

- **The following information was collected** (all information was collected with the assurances of full confidentiality):
  - Data on craft distiller production size and patterns, sources of revenue, and the category’s overall economic impact within the spirits industry
  - Data on craft spirits business size, patterns, and outlook on the wholesaler and retail levels (both on- and off-premise)
  - Input on craft spirits brand perceptions

- **Things to remember:**
  - When estimating the number of producers behind the U.S. craft spirits production, the Project team relied on a combination of official data released by regulatory authorities, survey data, other industry data sources both national (e.g., NABCA, ACSA) and regional (e.g., guilds), as well as interviews and team assessments using the craft distiller definition
  - In the accompanying data sets, the team assumes independent ownership as having equal or more than a 75% equity stake and/or operational control of the DSP. The team has set up a process that asks industry members to notify the ACSA of all ownership or strategy changes away from craft so the changes can be reflected accordingly in the database
The American Craft Spirits Association (ACSA) is the only registered non-profit trade association representing the U.S. craft spirits industry. Its mission is to elevate and advocate for the community of craft spirits producers. Membership in ACSA is open to anyone.

ACSA is governed by a Board of Directors elected by the eligible voting members of the Association. Voting members must be independent, licensed distillers (DSPs) annually removing fewer than 750,000 proof gallons from bond (the amount on which a federal excise tax is paid.)

ACSA was founded in 2013 by 23 founding craft distillers.
The IWSR is the leading source of data and analysis on the beverage alcohol market. IWSR is the longest-running research company specializing exclusively in global alcoholic drinks. The IWSR’s comprehensive database quantifies the global and local market of wine, spirits, beer, cider and prepared cocktails by volume and value, and provides insight into short- and long-term trends.

Park Street delivers productivity-enhancing and cost-saving back-office solutions, advisory services, and working capital to more than 12,500 alcoholic beverage brands from the U.S. and around the world. Established in 2003, the company provides a fast and reliable conduit to the U.S. and EU markets and a cost-effective operating platform. Park Street works with suppliers at all stages of growth and its clients range from entrepreneurial craft distillers to multi-brand global portfolios.
Project Supporters: Broad Industry Collaboration

**TTB:** Provided Beverage Spirits Producers and Bottlers by Average Taxable Removals; agreed to change annual reporting moving forward to enable consistent fact basis

**WSWA:** Assisted in wholesaler survey design and execution with members

**ABL:** Assisted in on- and off-premise retailer survey design and execution with members

**NABCA:** Provided in-depth view of craft distillers using control state data
What Constitutes a Craft Spirit?

- There is no universally accepted definition of craft spirits in the industry, and the expression “craft spirit” is not protected in any way.

- Given the positive trends for craft spirits from a consumer perspective (e.g., premium to other spirits, rising demand), there is a natural incentive for brands to utilize craft spirits cues and position themselves as a craft spirit.

- The industry has responded with different definition attempts based on criteria for the producer of the craft spirit including production steps at the location, ownership and operational control of the distillery, subscription to an ethics code based on honesty and transparency, production methodology, and size of production.

- Many of the criteria used or suggested by industry members would require a formal certification or peer approval process in order to be used as a universal base for quantification purposes.

- As long as a universally accepted craft spirits certification or approval that could be used as an industry wide criteria remains unavailable, the quantification has to rely on certain verifiable quantitative metrics which are complemented by estimates to bridge gaps.

- Looking at the manufacturer, size of production, ownership/control, and production specifics are criteria that could possibly be measurable and verifiable. However, the consistent collection of the data is not without barriers and could be very cumbersome, which suggests the potential use of a pragmatic approach.

- U.S. craft spirits, as defined pragmatically for the purposes of the research, are distilled spirits that are produced in the U.S. by licensed producers that have not more than 750,000 proof gallons (or 394,317 9L cases) removed from bond, market themselves as craft, are not openly controlled by a large supplier, and have no proven violation of the ACSA Code of Ethics.

The Act provides for reduced tax rates on distilled spirits, wine, and beer for the 2018 and 2019 calendar years.

There are two reduced tiers for Distilled Spirits:
- The first 100,000 proof gallons will be charged at $2.70 per proof gallon.
- Over 100,000 proof gallons up to 22,230,000 proof gallons will be charged $13.34 per proof gallon.

The tax reduction is set to expire at the end of 2019.
